

8th January 2019

Dear Parents and Carers

KS2 Astronomy Evening Tuesday 15 January 2019

This term in Science we will be learning about Earth and Space. As part of our curriculum programme we will be holding an after school astronomy evening for all pupils. The evening will be held on the school premises and will run from straight after normal school finishing time until 6pm in the evening. We strongly recommend that all children attend what will be a wonderful and exciting evening.

During the evening the children will partake in the following activities:

Learn about the planets

Star gazing

Watching live streaming from the International Space Station

Investigation of an unexplained event

On the day the children will need to bring a “packed tea” and drink with them. They will eat this before the activities start and as it becomes dark.

At the end of the evening, children will need to be collected from school as normal at 6pm. We would be grateful for any help from parents who could bring telescopes along to the evening and help us show the children how to star gaze.

If you require any more information please contact Mr Hirst.

.....
Please return to school by Friday 11th January

My child: Class:
will be/ will not be attending.

I can bring a telescope and can help children look at the stars: Yes / No
